Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 3-8 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The recitation of "substantially" in claim 4, line 7 is regarded as "new matter". Applicant originally discloses a nearly one to one ratio, not a "substantially" one to one ratio. The ratio is described as "greater" than one to one in the original disclosure. Likewise, the recitation of "balanced" in claim 5, line 6 is regarded as "new matter". The recitation of "supplying" in claim 6, line 17 is regarded as "new matter". The application of a "second" or reduced pressure by the gas controller 16 is actually a "venting" stage from the gas inlet, not a "supplying" stage to the gas inlet. Claim 7 is regarded as "new matter". No "third" pressure is disclosed in the original specification. Likewise, the recitation of "operates to balance said piston at a position intermediate said first and second positions" in claim 8, lines 2-3 is regarded as "new matter".

2. Claims 3-8 are further rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitations in claims 4, 5, 6, 7, and 8, described above, are inaccurate for the reasons described above.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3753

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 3-8 are further rejected under 35 U.S.C. 102(b) as being anticipated by Reilly. As described above, claims 4, 7, and 8 are inaccurate. The recitation of "balanced" in claim 5 does not define over Reilly. The "conventional control valve" described in column 5, lines 10-11 of Reilly is read as a "gas controller".

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-5 and 7-8 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Reilly in view of either Taylor or Sealfon et al. It would have been obvious in view of the pistons shown in either Taylor or Sealfon et al to substitute a piston valve which is balanced or has a one-to-one ratio for the piston valve of Reilly.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
